Collection

plumplay

In 2020 Plum® continue to disrupt the outdoor toy category...

Over the past year innovation has been at the forefront of our focus, with the launch of our BOWL freebound trampoline looking to be the coolest outdoor product for spring/summer.

Active play has never been more important to children's development and family life. The need to moderate the virtual world for young children has become a challenge for modern parents. At Plum® we design fun products to improve mental and physical health. We are creating experiences in the safety of a home environment.

Our son Paul has taken the lead as Managing Director at Plum® in 2019. In his successful first year we have seen growth across all our markets and we have seen our family business expand internationally, making the Sunday Times SME Top 100 Export list for the first time.

Distribution will continue to play a vital part in our growth as we expand into new categories. After the success of the Globber scooter launch in 2016 we welcome the expansion of our wheeled category with Plum® now announced as the official UK distributor for Injusa licenced ride-ons. Our core outdoor toy collection also sees the introduction of best-selling Happy Hop inflatables from Swiftech. Distribution for both new brands will commence in the UK early 2020.

In an ever changing retail landscape the Plum® team remain very busy supporting our customers, whether that be designing and developing new ideas, creating engaging content with eye-catching campaigns, or expanding our offering through the introduction of new ranges.

As we move into 2020 we'll continue to innovate, bringing never before seen toys to our worldwide customers through new and existing channels.

As always we thank you for being our customer and in helping us to inspire kids to explore, imagine and play!

Jonathan, Diane and Paul Schaffer

Experience a
life at play

At Plum® we are dedicated to designing toys for a healthier world and strive to develop affordable, sustainable products with accessibility and ease.

Active play during childhood remains our No.1 priority and as the dangers of screen time become a reality for young children, communicating the benefits of physical play has never been more important.

Insight driven marketing and design is helping us evolve our brand focus to deliver new products and campaigns that are important to the lives of consumers today.

30 **Over 30 Years of Family Values**
'Family first' inspires Plum® and firmly sits at the core of how we operate today, from our values through to our customer service.

Inspiring Young Minds

We create the tools for imaginations to grow and explore through traditional play.

Packed Full of Fun Features

Keep little ones curious about discovery, busy learning through play and most of all having fun!

Award Winning Design & Innovation

Passion drives our design team to innovate new toys every day using the latest technology.

In Safe Hands

Our safety first philosophy sits at the very heart of our brand.

Play For Every Stage of Childhood
Growing their confidence from baby's first steps to their first swing and slide, bigger jumps, adventures and beyond.

Fun For The Whole Family

Play brings families together to create a childhood of fun and a lifetime of memories.

Kind & Friendly to the Planet

We carefully select our manufacturers to be kind to the planet, using only FSC™ certified sustainably sourced wood.

Quality Materials Made to Last

Designed for safety, made using quality and durable materials.

2020

What's new

Introducing the highlights from our latest designs and innovations.

110

Creating ease through adaptable products

Sensory play with the advantage of outdoor stimulation has never been more desired by parents. Plum® have taken the traditional sandpit and adapted its function to deliver play with shade, storage, and a stylish modern look.

80

Customise your colours

New to the Colours by Plum® for 2020; the Boathouse and giant sandpit offer a higher price point for this unique collection of playhouses and children's garden furniture.

Create a colour pallet unique to you with our new pastel collections.

Marketing Support

Our selling tools and marketing assets are available on the Plum® Asset Hub. Bring play to life with our inspiring lifestyle photography, detailed product imagery, engaging video content and creative campaigns.

10

Add on play

Due to high demand Plum® are introducing monkey bars for 2020. Available as a stand alone frame or Lookout Tower ad-on, the monkey bars are a space saving option for smaller gardens or existing frames.

discovery

Discover water play

STEAM play in nature, inspires the design and development of our best selling Plum Discovery® collection. This 2020 edition to discovery play sees Plum® take on water; water play stimulates creative learning, allowing children to develop both physically and mentally during their early years.

The natural, raw design of the Plum Discovery® Forest Water Run has been crafted from premium FSC™ certified sustainably sourced wood and includes the discovery half round pole and bamboo signature loved by our customers.

Our global customers

Our manufacturing and ethics

We are extremely proud to sustainably source and manufacture each element of our products. Our commitment to be kind to the environment goes all the way back to our beginnings; we are now celebrating over 30 years of sustainable trading.

Our sustainably sourced wood

All of our timber is FSC™ certified sustainably sourced wood. Our North European timber comes from trees that are slow grown for at least 30 years. This timber is heavier and stronger than faster growing trees in warmer climates, ensuring our products are built to last. The timber is dried and pressure treated so it is rot and insect resistant. It is free of bark and there are no loose knots. Plum® has been using arsenic free preservatives (CCAFree) since 2004.

Ethical manufacturing

Ethical manufacturing is non-negotiable. We ensure that our products are responsibly and ethically sourced. All of our factories are audited to ICTI and BSCI standards.

Safety Testing

EN71: All of our products are tested to comply with all relevant European Safety Standards (EN71-1,2,3,8,14).

REACH: All of our materials are tested to meet REACH Chemical Standards.

ICTI and BSCI: All of our factories are audited to these ethical standards.

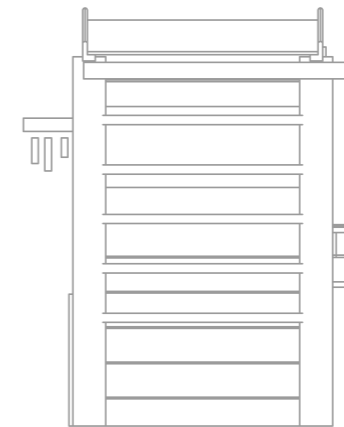

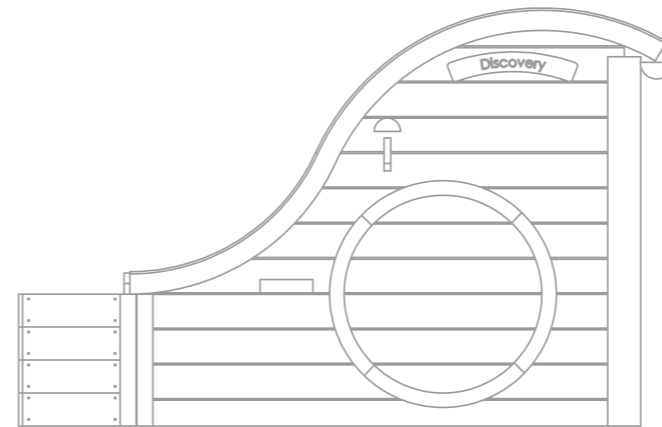

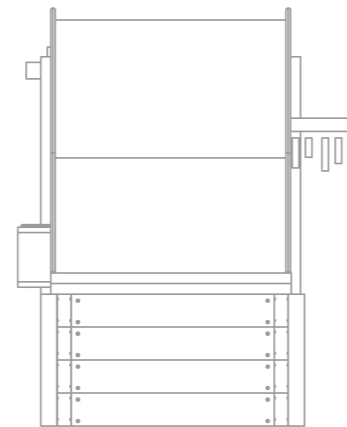

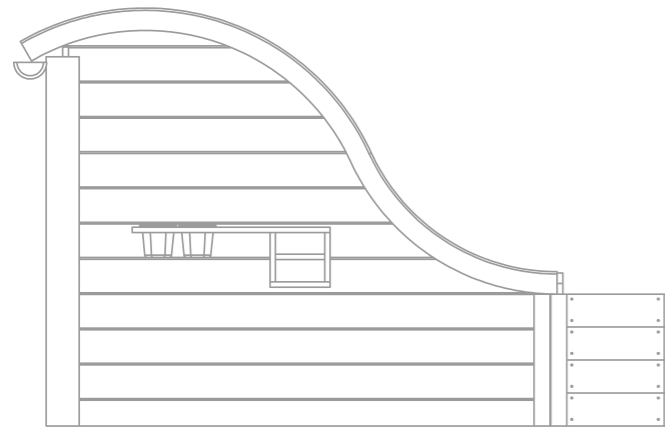

Behind our design innovation

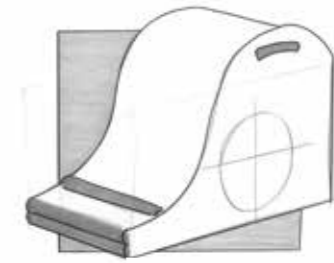

Every day our NPD team of passionate engineers, designers and safety experts work together to bring play to life, improving the lives of consumers so they can enjoy a life at play.

Each of our products are designed for safe play and engineered for high performance. From our smallest sand pit, to our feature-rich role play toys and our flagship Wildebeest Playcentre, each one of our designs is engineered to surpass stringent toy safety standards, exceed our quality checks and impress in homes and gardens.

Our in-house design and product development experts continuously improve and innovate, to make our toys the best investment for children and their development. We respond to customer reviews and feed all learnings back into our design process by way of continual improvement.

Product mood boards
Key trends and consumer behaviours provide an essential insight into our development programme. This key research challenges our designers thinking into how they can tangibly improve the lives of the consumer.

Materials for style, durability and ease
The design is refined and materials chosen. Play features, accessories and finishings are added and tested for play value.

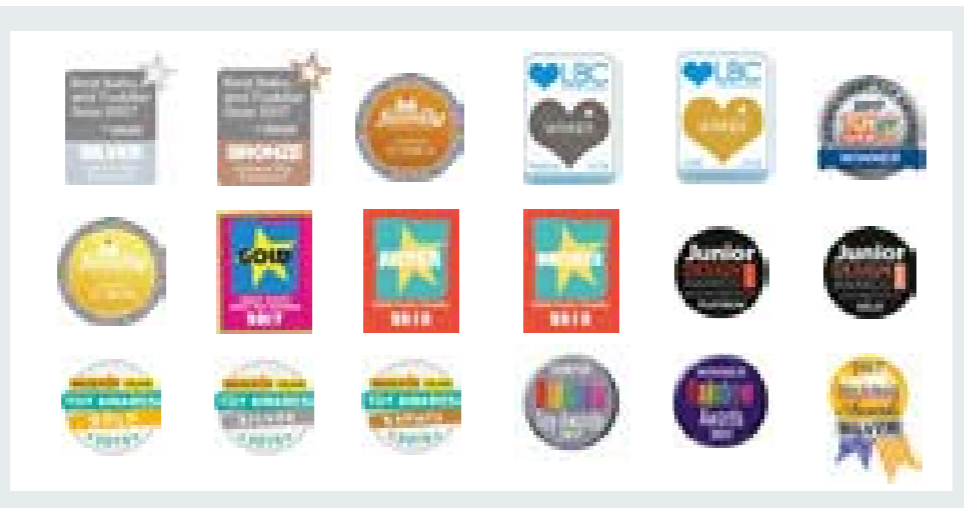

Crafting the form
Different forms and shapes are explored for style and purpose. Discovery allows children to immerse themselves in the natural world.

Personalisation plaque

Our awards

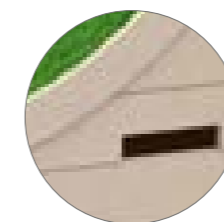

We continue to design award winning products. Plum® won numerous toy awards in 2019 across all product categories.

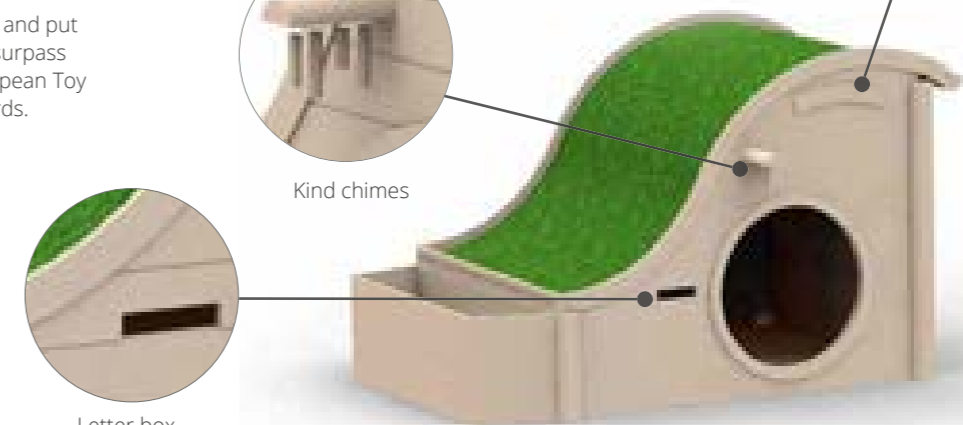

Made to last
Manufactured and put to the test to surpass stringent European Toy Safety Standards.

Letter box

Plum® Discovery Play House

Plum® is committed to nurturing creativity and curiosity in a fun yet safe environment. With QA teams in the UK, Hong Kong and China, and a representative on the European Trampoline Safety Committee, Plum® stays at the forefront of cutting-edge safety development, giving children the freedom of play and parents peace of mind.

What makes our trampolines Springsafe®?

We recognise the concerns of injury caused by trampolining. In order to provide the best bouncing experience for our users we developed Springsafe® technology and features. The Plum® Springsafe® design confronts two important safety issues; injury caused from contact with springs and injury caused by strain.

Springsafe® ensures that users are out of reach from Plum® springs and frame parts at all times; and we use high performance springs in all our trampolines to provide an even and controlled bounce that is kind to joints.

Find your bounce

The length of a spring determines bounce performance. We use different length springs on our trampolines to suit the user and their required bounce. Long springs on premium trampolines give a softer, but more extreme bounce, where shorter springs give a more controlled, smaller bounce, making them ideal for our junior trampolines and beginner jumpers.

Spring testing for play endurance

We test every batch of springs we receive with a lifecycle and salt spray test. During the lifecycle test we stretch and release the spring on a 30,000 cycle to ensure long lasting safe play. By salt spraying the springs, we test the galvanised steel and guarantee they are rust resistant.

New bounce innovation for 2020

In 2019 we set out to challenge the traditional flat bed trampoline to create a new revolutionary play pattern; adding new directions, changing the way kids bounce and release their inner energy.

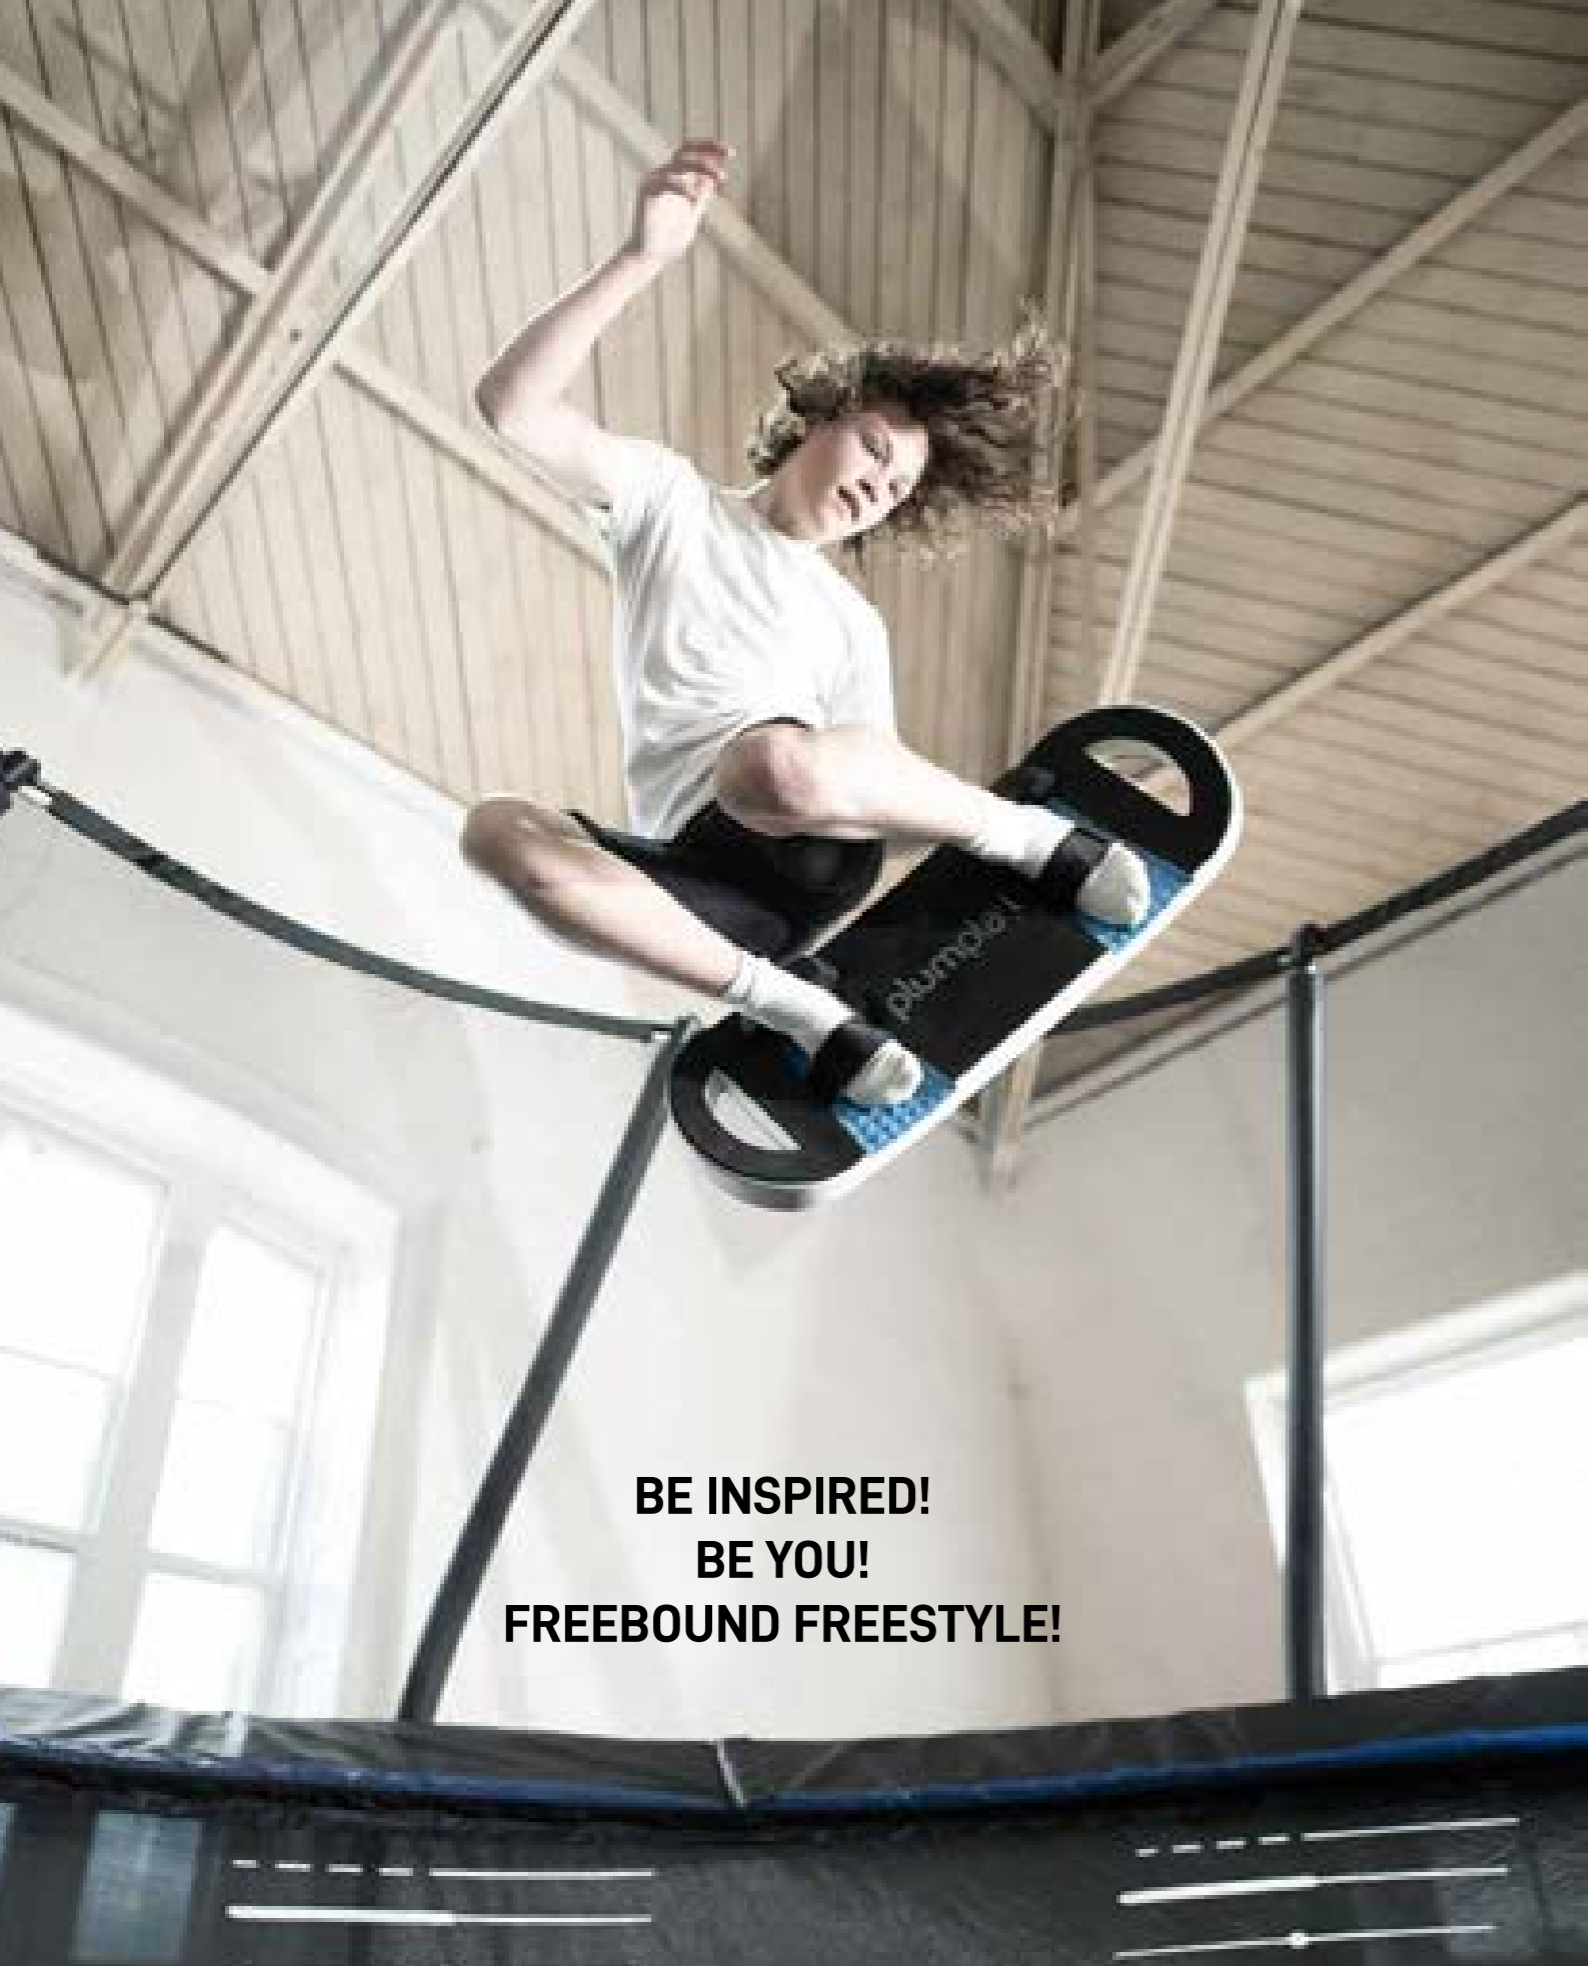

Designed and tested to be the safest, most thrill seeking trampoline experience. We've created a unique freebound environment with three cutting edge USPs. The BOWL is the safest way to bounce.

"We understand the importance of safe play and your child's well-being is at the forefront of our design process. We pride ourselves on creating toys for childhood development, encouraging a healthy and active outdoor playtime."

David Woodman,
Plum® Director of Product Development.
European Safety Standards Committee Member.

A large background image showing two children on a trampoline. One child is sitting on the edge, and the other is standing on the mat. The trampoline has a black frame and a dark mat. The background is a grassy area with trees.

Our safety commitment

**BE INSPIRED!
BE YOU!
FREEBOUND FREESTYLE!**

BOWL

freebound trampoline

Introducing the first generation of Freebound Trampolines... Plumplay have revolutionised the traditional flat bed trampoline; transforming the jumping mat into a new curvilinear form.

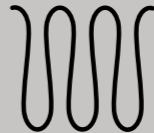

3 CUTTING EDGE, UNIQUE FEATURES

CURV

The CURV creates a new contour play pattern allowing kids to express themselves through dynamic movement in boundless directions.

FLX

Super soft FLX bungees are super silent... Held by a FLX secure clip; 136 bungees work in unison, powered by movement.

BOWL

A new iconic shape inspires freestyle play in the ultimate safe environment; providing a space where kids can challenge themselves, learn new skills and ultimately build confidence.

Influenced by extreme sports and the urban landscape, hi-tech materials give the BOWL performance power.

Durable cushioning
Soft, safe cushioning with high weather resistance protects the frame and provides safe entry. The thick PVC padding is divided into eight separate sections for easy installation; each section meets to unite the protective pad.

Silent Flexible Bungees
Powering the BOWL as you freebound, the elongated FLX bungees are made from 120 individual elastic threads, encased in a woven nylon. When installed each bungee takes on a quad formation to enhance performance.

Flex Secure Clip
Each bungee is safely held in place by the secure clip, exclusively designed to keep the freebound trackmat taut to the trampoline frame. Simply stretch and secure the FLX bungees into place to form the BOWL structure.

Freestyle Trackmat
CURV innovation forms the jumping mat. Track prints visualise the movement and can be used as markers to enhance freebouncing.

See-through Supernet
The extra thick, super soft feel and see-through enclosure makes the BOWL supernet... super! Protecting the interior of the BOWL; the enclosure provides a safe space as you freebound and isolates the bungees.

Hi-visibility Reflective Entrance
Seamlessly combining safety with sports inspired design; the reflective entrance with YKK zip secures the enclosure during use.

Stable Rubber Grip
Anti slip rubber grips are inlaid into each step of the BOWL ladder for safe and stable access.

01

Springsafe® Active Play

Springsafe®
technology

With over 1 million sold worldwide, Plum® trampolines are the smartest, safest option for the ultimate bouncing experience! Plum® has a range of market leading trampolines that combine innovative safety features with cutting edge technology and unique designs.

Fun for the
whole family

Junior Springsafe® Trampolines

Plum® Junior Trampolines are perfect to build confidence in physical play. Specifically designed for young children, each trampoline is fitted with safety features to keep the child low to the ground and separated from the springs and frame parts.

Outdoor Role Play

Providing the perfect place for children to be creative, imagine, and recreate real life scenarios; role play is essential for social development during the younger years. Plum® Outdoor Role Play collections allow children to experiment, communicate and collaborate, whilst exploring the great outdoors. Through unique role play products from Plum®, children will challenge themselves and learn new skills in new environments. All made from FSC™ certified sustainably sourced wood.

Playhouses

With a Plum® Playhouse children can create their very own clubhouse and hide away and play. Our unique and stylish playhouses are the centre of adventure. All made from FSC™ certified sustainably sourced wood, treated to be weather resistant for longevity, providing years of play as children grow.

New Colours

With our wooden colours collection you can customise garden play, creating a unique collection.

discovery

Discover creative, adventure and messy play to inspire a love of nature and engage children in STEAM education in the early stages of childhood. We have developed a range that provides the tools for little ones to explore and tinker in the garden. Working alongside Forest Schools we've created products that build skills and interests that serve children throughout their school years.

Plum® Discovery
Forest Water Run
27694AA69
27703AA69 - Premium

- 3 level water run with 5 individual wooden reservoirs which joint together
- Footprint can be altered to optimise space and change the water flow
- Natural bamboo racing chutes
- Three-way water racing gates can be opened and closed to different heights to regulate flow and water direction; allow children to race and play together
- Transparent gates have level markers that allow children to see and measure changing water levels
- Easy to use ergonomic hand grips are specifically designed for small children
- Clear watertight liners
- Easy clean painting screen
- 2-in-1 step and storage box
- A premium version of the water run is also available, this version includes:
 - Wooden blocks to change and stop water flow
 - Water cascade for added sensory play
 - Water balance
- Assembled size: Full length, straight line - L339cm xH576cm xW850cm

Buyer's
Guide

plumplay

Buyer's Guide

With our buyer's guide you can shop all our products by range in one place; allowing you to search from Trampolines to Role Play toys.

Within this section of our catalogue you can also learn more about our logistics program, in-store POS solutions and online marketing support.

Our logistics

Our international network of agents, distributors and sales force mean our global reach maintains a local presence. Our flexible routes to market help get our toys to the right place at the right time. With logistics operation teams located in global head offices, our adaptable warehouse working patterns assure we're always ready to meet customer demands.

Direct from our factories

With our Freight on Board (FOB) program you can buy toys direct from our factories. This is the best value way to get our toys onto your shelves. We will support you with product development, sales and order negotiation, production planning, shipping coordination and administration.

Bulk ordering

Choose your toys and we'll make it happen when you place bulk orders directly with us. Our in-house trade support and warehouse teams will promptly process, pick and ship them directly from our head office to your warehouse.

Ordering internationally? Our skilled operations team negotiate the best rates overseas to ensure you get you the best price.

Our dropship program

Our comprehensive dropship program is available in selected countries. Operating from our 25,000m² UK-based distribution centre, we ship over 1,000 orders each day, delivered straight to your customers using our carefully selected delivery partners.

Our UK based dropship team provide full customer support of all listings. The team optimise copy and content, coordinate promotional and marketing activity and provide market analysis.

Operating from our
25,000m²
UK-based distribution centre

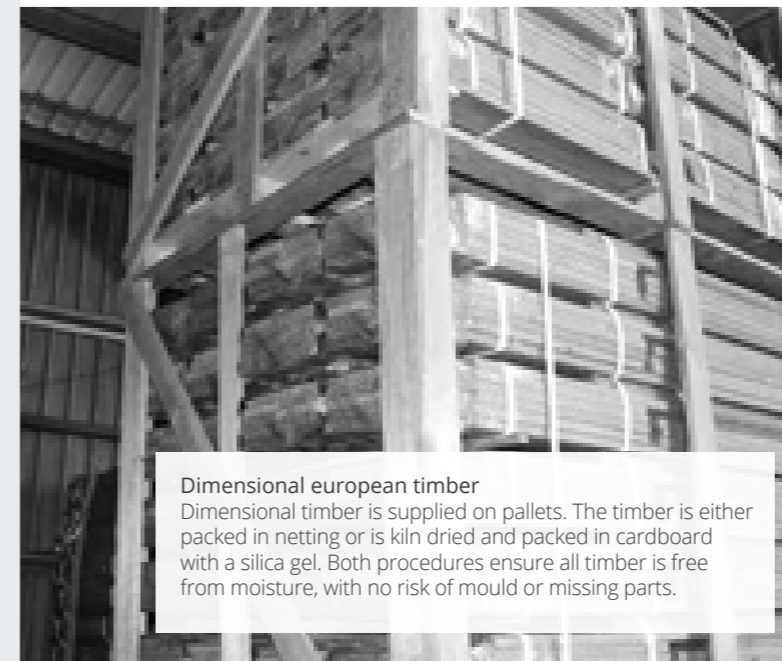

Tips for receiving our goods

Round pole

We supply our round pole bound together on custom made pallets. This bespoke solution is ideal when shipping large timber. We store all of our round pole outside in its natural environment, allowing it to breathe and adapt before construction in the garden.

Leg packs and crossbeams are forklift moveable and can be double stacked for transport and storage, with an overhang on all poles.

Hardware is palletised for transport and cartons are double walled for strength.

Dimensional European timber

Dimensional timber is supplied on pallets. The timber is either packed in netting or is kiln dried and packed in cardboard with a silica gel. Both procedures ensure all timber is free from moisture, with no risk of mould or missing parts.

Slides

Our slides arrive stacked on a pallet ready to be picked and bagged easily at source, to be sent via local carrier for home delivery. We supply our goods this way so our customers benefit from freight efficiencies.

Boxed items

Our retail packaging is a heavy duty corrugated 100% colour box. Boxes are banded for additional security with balanced weight for stability. Item weight is printed on the box with warning for heavy items. Product barcodes and batch codes are printed on all items.

Trampolines

Plum® Trampolines are supplied boxed. We aim for minimal or zero overhang on pallets for distribution centre compatibility. Customers are advised to note box dimensions for compatibility at automated centres.

Trampolines come in industrial stapled boxes for strength and are banded for security with balanced box weight for stability. Box quantity and item weight are clearly printed on the carton.

Our new 30kg 8ft trampoline offers simple delivery for dropship orders. Meeting courier weight for a one box item, this new design gets you better rates on our best selling trampoline.

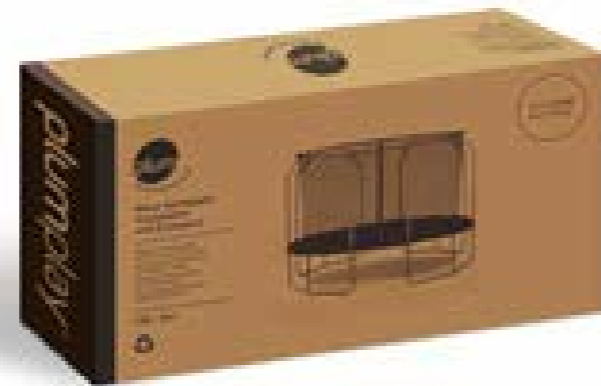

Create an eye-catching in-store display. Our full colour box has bold branding and eye catching colour. Each box is designed to demonstrate product scale and quality, delivering maximum shelf impact.

Counter display units and point of sale solutions are designed to create alternative, flexible in-store solutions for our retailers.

With English, French, Spanish, German and Italian packaging and instruction manuals, our products are ready to be sold across the globe. Extended safety information is now available in over 20 languages.

New brown box

By reducing plastic and going natural where possible our new brown box packaging now delivers a product with even more purpose to the doors of our consumers.

Multilingual packaging restyled

In-store solutions

Bring the outdoors into your store. We continue to innovate and create convenient retail solutions to help you sell large play items in-store. Complimentary to our one box solutions our POS displays allow your customers to explore a full product range in-store like never before.

These adaptable in-store solutions come in a range of display sizes and can be tailored for product, collection, season, and promotional requirements.

Retail display board

Available now, our retail display board showcases our extensive range of large activity toys in a small retail space, driving sales in store. Dispensers hold product cards helping consumers select the right toy for them.

Playful gift box

With our playful gift box and FSDU you can beautifully present a choice of active play products in a small retail space. Our great value solution is designed to capture sales in-store directing the consumer to the till, giving your customers a physical gift with the convenience of home delivery.

Consumer brochure

With our consumer catalogue your customers can browse our full product range.

Marketing support

Create the best online product experience. Our team of marketers are here to support you with all the digital assets you'll need.

Selling tools & assets

Available now at a click of a button on our Asset Hub, our imagery and creative content sets us apart in the industry bringing play to life.

Inspiring photography

Our powerful visual storytelling video and lifestyle photography help us deliver the product experience and sell whilst building a stronger brand.

Crisp cut out photography demonstrates quality and size, and highlights features.

Engaging video content

Build a stronger online presence with our video archive. This now extends from storytelling lifestyle videos to assembly product build clips and customer service advice.

Creative marketing campaigns

Our annual campaign calendar includes new product launches and

retail calendar events. Through our Plum® Asset Hub you'll have access to creative content ready to use on Facebook, Instagram, email and your website.

Web Banners and Online Creative

We've created banners for your brand store, homepage and email campaigns. Our captivating imagery will help to direct traffic and increase sales.

Social Media

Stay active with us on social media, channel specific content is now available, designed to increase engagement as well as product and brand awareness.

Across our channels we can offer the following support to boost sales and service. Collaborative competitions, live promotion referrals, Influencer products reviews, as well as Facebook video ad content, insights and instant customer service.
